AI IN SAFETY WORK

AI in your safety week

Fill this in before you speak to any supplier. One row per job. The last column is filled in as a starting point; change it to fit your site.

Site	Completed by	Date

Job	What we do by hand now	Time it takes each week	Shifts or areas it misses	What a tool would need to show us	What stays with our team
Near misses					Asking why it happened; keeping people reporting
Checking controls					Deciding what a pattern means and what to change
Investigating					Talking to people; finding the cause; keeping it fair
Reviewing					Choosing priorities; reporting to the board and the workforce
After a change					The briefing itself and the consultation

Before you introduce any tool

Check	Done (date)	Notes
Risk assessment for the tool, including cyber security		
Workforce consulted in good time, views recorded		
Data protection impact assessment (DPIA) considered		
Workers told what is monitored, how and why		
Who reviews flagged events, and how often
